# Indusmation Channel Partner Program

# Our Profile

Industrial Process and Emissions control experts .... *five decades of combined experience*

Wide range of process and emissions analyzers .... *for every application*

Channel Partner program launched in 2021 .... *successful EPA Methods tool kit*

# Our manufacturing facilities

*Houston TX  
Long Beach CA*

# Our Products and Systems

- *In situ, Cross-stack, Extractive technologies*
- *TDL, IR & UV, ECD analyzers*
- *Process & Emissions analyzers*
- *EPA Method Kits, samplers, analyzers*

# USEPA Methods and prospects

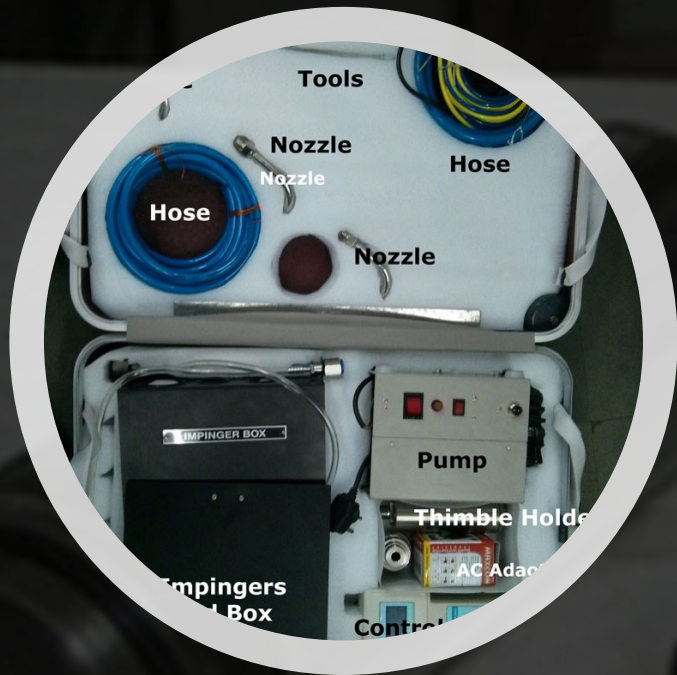

**The US Environmental Protection Agency (EPA) has developed a wide range of methods for measuring the concentration of pollutants in air, water and soil based environmental samples**

**Some of the factors driving the demand for EPA method sampling equipment in developing countries:**

- *Increasing awareness of environmental issues*
- *Stricter environmental regulations*
- *Growing investment in environmental infrastructure*
- *Technological advancements*
- *Several pollutants can be analyzed only by Method Kits*

**Some of the specific applications of EPA method sampling equipment in developing countries:**

- *Air quality monitoring*
- *Water quality monitoring*
- *Soil and sediment monitoring*
- *Industrial emissions monitoring*
- *Environmental impact assessments*

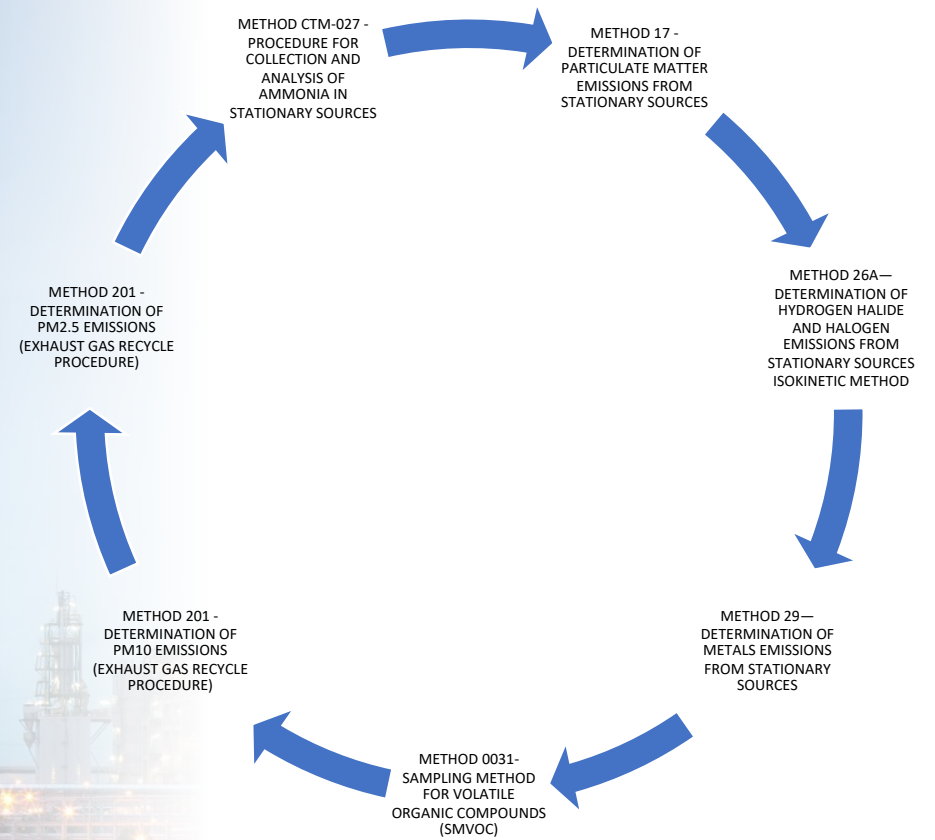

# USEPA Method Samplers and kits
